Conclusion This tutorial explained how to use the Rupee Font in LibreOffice and on websites and in your documents and documents. If you liked this tutorial, you can send me a few dollars for making it. Q: How to sort any List into any order? I have a List ListaStringa, and i need to make a "SortaSorta" sort to put the String1 first, then the string2 then the string3 and then so on, and when the list is finished the order has to be the same as it was before. Any suggestions? A: Use a SortedList with custom comparator. For example, When you sort a list, you have to create a Comparator object. Comparator class defines the following methods: public int compare(Object o1, Object o2) public int compare(82157476af
